

Beaver Creek Elementary School District

The Beaver Creek Elementary School District consists of twelve buildings on one campus that includes an elementary school and district office. The District serves approximately 263 students in grades Kindergarten through eighth. There is one Main Distribution Facility in the Library feeding five Intermediate Distribution Facilities.

The IDF serves twenty-nine Learning Areas and approximately 60 network devices. All equipment has been installed per specifications and the network is operational including access to the Internet. The District representative expressed their satisfaction with the installation and looked forward to their continued development for using these tools for teaching and learning.
